THINKING POWER... EXCLUSIVELY

# PROVEN RESULTS

FOR POWER DELIVERY PROJECTS

*For the most successful projects, you need a team you can rely on to get the job done regardless of the obstacles. Sargent & Lundy has proven again and again that it gets the job done for every client. Our distinctive capabilities provide clients and partners with a thoroughly reliable source of comprehensive expertise. This consistent level of success is based on Sargent & Lundy's...*

# PROVEN

## EXPERIENCE

**With 110 years of serving the power industry and seasoned teams who have worked on a continuing series of projects, Sargent & Lundy has the highly qualified power delivery services staff with the industry-leading experts you need. We have provided engineering for projects in all voltage classifications, including additions and upgrades to the grid and interconnections of IPPs.**

## RESOURCES

**Consistently ranked among the top power engineering companies, S&L has the resources required to address the wide range of technical issues and to maintain the compressed schedules that are prevalent today. Our resources include a depth of personnel in all disciplines associated with engineering, design, and construction of transmission lines and substations.**

## QUALITY

**S&L is committed to achieving the highest level of quality in all of our activities. The firm is a certified ISO 9001 company and our highest priority is providing professional services and quality deliverables that exceed your expectations.**

# RESULTS

## RESPONSE

It's not enough to have the qualifications to do the job. You need a team that responds to the changing requirements and takes the necessary action to keep the job on track. Your priority is our priority and our team members are "on call" to tackle the expected and unexpected challenges that arise.

## FOCUS

S&L is dedicated to serving the electric power industry and all of our experience and resources are focused on electric system projects. The Power Delivery Services group is specifically focused on transmission system facilities and has the full capabilities and expertise to address all aspects of these projects.

---

## COMPREHENSIVE SERVICES

Our capabilities include complete professional services for transmission lines, substations, and distribution systems. We offer comprehensive services that can take your project from concept to completion, including Engineering and Design Services, Construction Management Services, and Consulting Services. >>>

Our flexibility and responsiveness extend to providing services under a broad range of contracting options, from traditional design-bid-build projects to total engineer-procure-construct contracts. Building upon our significant core resources and proven experience with management of major projects, we bring together all the necessary capabilities your project requires.
